

INVITATION

# Wire Processing Symposium

10 - 11 October, 2018  
VSM Technical Center in Hanover

In cooperation with:

## Wire Processing – The Challenges

Wire – few other semi-finished products in the metal industry go on to be processed in so many ways. Various sizes are used, with diameters ranging from 0.01 to 10 mm, and with many different materials, in the form of ferrous and non-ferrous metals. And it does not end there – wire can be found in a multitude of forms, from steel shot to coil springs and suspension cables.

In addition, the requirements are constantly being driven forwards by new technologies, automation, innovations, capacity expansions and holistic thinking, including environmental protection and waste disposal issues.

# The Symposium

The Wire Processing Symposium offers you a forum for getting to know new wire processing methods and expanding your expertise in the field.

## Main topics

- > Expert presentations on the entire process chain
- > Trade exhibition for a "hands-on" understanding of the machines and exhibits, set out as thematic stations
- > Factory tour to give an insight into the manufacture of abrasives

## Your benefits

- > Broaden your knowledge of the entire process chain
- > Be introduced to thought-provoking ideas for the entire wire processing operation
- > Get to know the people who will support you with expertise and enthusiasm on a partnership basis

## Our service

- > Simultaneous interpreting into English
- > Lunch and evening meal
- > Shuttle service from the hotel to VSM and back

## Details

- > **9 October**  
Arrival and evening meal together
- > **10 October**  
Symposium from 9 am to 4:15 pm
- > **11 October**  
Symposium from 9 am to 4 pm
